Coffee Shop Sales Analysis

Dashboard Insights & Business Recommendations

Project Objective
The main objective of this project is to analyze retail sales data to gain actionable insights that will enhance the performance of the Coffee Shop.

1. How do sales vary by day of the week and hour of the day?

Sales activity varies throughout the day. Monday recorded the highest sales by day at approximately $101,677, followed closely by Friday at approximately $101,373. Saturday had the lowest sales at approximately $96,894. During the day, sales are strongest in the morning, particularly between 8 AM and 10 AM. The dashboard shows 10 AM as the strongest hour, with approximately 26,713 units ordered.

Business Insight: Customer demand is concentrated around the morning period, especially during breakfast and morning coffee hours.

2. Are there any peak times for sales activity?

Yes. The main peak period is between 8 AM and 10 AM. The dashboard shows approximately 25,197 units at 8 AM, 25,370 at 9 AM, and 26,713 at 10 AM. Order volume drops sharply after 10 AM.

Business Recommendation: Ensure sufficient staff, inventory, and fast service during the 8–10 AM peak period to reduce waiting times and avoid stock-outs.

3. What is the total sales revenue for each month?

The monthly revenue figures are: January – $81,677.74; February – $76,145.19; March – $98,834.68; April – $118,941.08; May – $156,727.76; June – $166,485.88. June recorded the highest monthly revenue, while February recorded the lowest.

Business Recommendation: Investigate the factors behind the strong growth from March through June, such as promotions, customer demand, product mix, or seasonal effects, and replicate successful strategies.

4. How do sales vary across different store locations?

Hell's Kitchen generated approximately $236,511.17 in sales with 50,735 footfall. Astoria generated $232,243.91 with 50,599 footfall, while Lower Manhattan generated $230,057.25 with 47,782 footfall. Hell's Kitchen is therefore the highest-performing location.

Business Recommendation: Use Hell's Kitchen as a benchmark and analyze Lower Manhattan for opportunities to increase customer traffic.

5. What is the average price/order per person?

The dashboard reports an Average Bill per Person of $4.69 and an Average Order per Person of 1.44. This indicates that the average customer spends approximately $4.69 and purchases around 1.44 items per order.

Business Recommendation: Increase average order value through cross-selling and product bundles, such as coffee with bakery items or coffee with snacks.

6. Which products are the best-selling in terms of quantity and revenue?

Barista Espresso is the highest-revenue product at $91,406.20. Brewed Chai Tea has the highest quantity sold at approximately 26,250 units. Other top-revenue products shown in the dashboard are Hot Chocolate ($72,416.00), Gourmet Brewed Coffee ($70,034.60), and Brewed Black Tea ($47,932.00).

Key Insight: The revenue leader and quantity leader are different products. This distinction can guide both inventory planning and promotional decisions.

7. How do sales vary by product category and type?

Coffee is the strongest category with approximately $269,952.45 in revenue, followed by Tea at $196,405.95. Other categories include Bakery ($82,315.64), Drinking Chocolate ($72,416.00), Coffee Beans ($40,085.25), Branded ($13,607.00), Loose Tea ($11,213.60), Flavours ($8,408.80), and Packaged Chocolate ($4,407.64). Coffee and Tea are the dominant revenue categories.

Business Recommendation: Keep Coffee and Tea as core product categories while using lower-performing categories selectively for cross-selling and targeted promotions.

Overall Business Insights

The analysis shows that the coffee shop generated $698,812.33 in total sales with total footfall of 149,116. Sales are strongest during the morning peak, particularly between 8 AM and 10 AM, with 10 AM being the busiest hour. Hell's Kitchen is the highest-performing store location, while Coffee and Tea are the dominant product categories. Barista Espresso generates the highest revenue, whereas Brewed Chai Tea has the highest quantity sold. Monthly revenue shows strong growth from February through June, with June recording the highest revenue.

Recommended Business Actions

- Optimize morning operations by increasing staffing and inventory between 8 AM and 10 AM.
- Prioritize high-performing products such as Barista Espresso, Brewed Chai Tea, Hot Chocolate, and Gourmet Brewed Coffee.
- Increase average order value with combinations such as coffee + bakery or tea + snack.
- Use Hell's Kitchen as a benchmark location and apply successful operating practices to other stores.
- Strengthen Coffee and Tea sales because they are the core revenue-driving categories.
- Investigate the strong revenue growth from March through June and replicate the factors that contributed to it.

Dashboard Improvement

The recommended analysis includes monthly sales revenue. To make the Excel dashboard more complete and presentation-ready, add a dedicated Month vs. Sales Revenue line or column chart so the monthly trend can be viewed directly from the dashboard.
